

Dear Parent,

Students are most excited about their future when they have a plan. The ASVAB Career Exploration Program (CEP) is a federally funded, no-cost, complete career exploration program that allows students to identify promising career options across four major career paths (college, work-based learning, military, federal government).

Assessments That Build Self-Awareness

The ASVAB is one of the most respected and validated aptitude tests that helps students learn about their strengths and work-related skills. When combined with interest and work value assessments, it provides powerful, personalized insights that guide informed career exploration. Together, these resources unlock the full potential of the OCCU-Find database, which provides detailed information on more than 1,000 occupations.

Tools for Success

Planning for a fulfilling career takes time and effort. The ASVAB CEP offers tools for up to two years that help students build individualized career plans, save them online, and share them with mentors as they map out steps to reach their goals.

Participation

The ASVAB CEP can benefit all students in 10th grade or above, including homeschool and college students. Participants have no obligation to the military. Parents can choose whether their student's scores are shared with military recruiters.

Empower Students to Make Informed Career Decisions

The ASVAB CEP helps students prepare for a future they can confidently look forward to.
